Get Pain Relief

at the speed of light.

The 830Laser sends light (photons) into your injured tissues and stimulates healing and reduces pain instantly. The light can penetrate 2 inches into your body without being absorbed by the skin, fat, or blood. No heat is generated so **it is safe** for use anywhere* on the body. Once the photons find the injured tissues, they stimulate and energize the cells to **repair and strengthen** at a remarkably fast rate.

This treatment does NOT wear off like most medicines, electrical stimulation, heat or ice. It increases your **body's own healing power** and enhances that process. True healing. If you don't reinjure the area, the pain should not return.

It successfully treats most muscle, joint, tendon, and nerve pain associated with Arthritis, Back Pain, Bursitis/Tendonitis, Carpal Tunnel Syndrome, Fibromyalgia, Heel Spur/Plantar Fasciitis, Migraines, Osteoarthritis TMJ, and more. It's even **safe on children!**

Treatments last between 10-40 minutes based on the severity of your condition. **Most notice results in just one treatment** but complete improvement of symptoms may take up to 9 treatments.

You may experience improvement after one treatment. Most conditions take between 2-9 treatments for complete alleviation of symptoms. Chronic conditions may require more treatment. Most acute inflammatory conditions respond to 830Laser treatment **immediately**. You will need to follow precautions in order to avoid re-injury or the pain may return.

830Laser treatment not only helps injured tissues and wounds heal faster, it also makes them stronger and less vulnerable to re-injury.

"The ML830 Cold Laser has clearly proven its clinical value treating CTS and has become the industry standard."

Dr. Charles Smith, M.D.
Professor of Orthopedics
University of Southern California

"This revolutionary laser technology is changing the way I and many other players treat injuries and chronic pain."

Matt Williams
Former World Champion
Baseball Player
