

To Whom It May Concern:

My name is James Ko and I'm a **physical therapist** practicing in Southern California. In the 9 years I've been in private practice, I've never seen anything like the 830Laser. It is **revolutionizing** the way I treat musculoskeletal injury, and the way I practice.

My first experience was with a 39 year old police officer. He was suffering from impaired use of his right hand secondary to a volar plate fracture of the 4th digit. After 6 treatments of traditional physical therapy, with minimal improvement in ROM, **I decided to try the 830Laser**. After only one treatment, I saw an **amazing** increase of 40 degrees in his PIP joint motion!

The results produced by the 830Laser **far exceed** anything I've ever seen with traditional modalities such as ultrasound, electrical stimulation, ice and heat. My patients are experiencing **faster pain relief, quicker tissue healing, and better outcomes**. Not only are my patients excited but it has **awakened an excitement** in me (not to mention, my referring physicians who are taking an active interest). It's a **blessing** to have such an effective tool available to us.

I **recommend** you get one for yourself. I've been using the 830Laser for only 2 months but confidently promote this device to any healthcare practitioner. If you are in the healing profession you must get this **one-of-a-kind** healing device. I've personally spent countless hours researching the different type of lasers out there and have not found any that match the healing properties of this laser. The 830Laser is the only one that utilizes the **patented** 830nm wavelength.

You can apply this treatment over **fractures, pins, and plates**--even wounds are shown to heal faster with laser therapy. I specialize in adolescent sport injuries and it is **safe on children** as well. In my opinion, no other tool is as **versatile, safe and effective** as this laser. It allows me to initiate treatment on patients earlier where in the past I would have to wait for the acute phase to pass.

My practice has **only gotten better** since I purchased this laser and I'm confident that yours will too. Call me if you have any questions. I'm always happy to talk about the 830Laser. I truly believe in this product and predict that soon it will become a household name.

Sincerely,

A handwritten signature in black ink that reads "James Ko P.T." The signature is written in a cursive style.
